BENJAMIN **WOOLSTON**

Business Analyst

OUTGOING

PASSIONATE

TEAM-PLAYER

Personal Statement

I am a highly motivated individual seeking to practically apply my skillset to work that I am most passionate about. I pride myself in being adaptable, a problem solver, and highly team oriented. My passions lie in using an engineering mindset to practically assist those around me. I can be relied upon to help the team achieve its goals as I am an ambitious individual with strong organisational and multitasking skills with an aptitude for technology.

EXPERIENCE

Aug. 2023 – Present

Technical Business Analyst
NB Industries
- My responsibilities span from revamping processes and systems to creating critical business documents, conducting workshops for requirement analysis, and offering data-driven recommendations.
- Strong focus on regulatory compliance & efficiency.

May. 2022 – Aug. 2023

Global Trade Control Specialist
Boeing Australia Holdings
- I make my team more efficient by applying technology.
- My teammates come to me with processes they want to get improved and I find them faster automated solutions - I thrive on enabling others to achieve their potential.

Nov. 2022 – Feb. 2023

Network Engineer
Telstra (Fixed 4 Month Contract)
- I managed and coordinated a small team of network engineers to help develop and deliver server upgrades to introduce efficiencies within the SMS team.

Jun. 2021 – May. 2022

Support Technician
Swyftx
- Took my team to #1 out of 14 teams by building advanced macro's in python to speed up our online customer support abilities.
- I initiated and ran weekly market presentation updates to whole company.

PROJECTS

Jan. 2017 – Present

Ecommerce Brand
I started my first business at 15, and now run Cannology.com.au. Over 50 Australian Chemists stock our products. I'm currently Emailing every chemist in Australia, all automated with Python & ChatGPT.

Jan. 2023 – Jun. 2023

T-Shirt Exploit
I needed more shirts, so I automatically emailed 5000 start-up companies asking for free merchandise. I collected emails & names by abusing Google's AI tool with 50 accounts and then automated emails with Python & ChatGPT. I received 90 T-Shirts, 10 water bottles & a $400 bag.

Feb. 2022 – Apr. 2022

Received Bounty for Windows Exploit
With a friend from university, we worked together to discover a windows 0-day exploit (The highest level exploit on Windows) and received a bug bounty for finding it.

EDUCATION

Grad. 2023

Bachelor of Electrical Engineering
Queensland University of Technology
- College of Excellence member, Club Secretary & Treasurer
